Subject: microsoft IS A monopolist!!

microsoft IS A monopolist!!

The settlement forces Microsoft to donate software, hardware, and services to America's poorest schools. Red Hat responded to the proposed settlement, pointing out that the settlement could simply introduce Microsoft to a market where they could further extend their monopoly. In its counter-proposal, Red Hat offered to provide free software to every school in America if Microsoft provided the value of its donation in hardware costs rather than its own software.

en this only makes it bigger!!
